

PROPELLER EMULSIFIERS

STAR Lt. 3-4

STAR Lt. 4-15

TECNOLOGIE
COMINOX

The **EMULSIFIERS** for colour printing are made in stainless steel AISI 316.

Features:

- Emulsifying group composed by centrifugal propeller with superior stator, sliding deflection disk.
- Piped shaft-propeller. This gives an advantage that all **external surfaces are static**, with the total expulsion of any kind of vortex around the driving shaft and the impeller, without capturing any air into the product.
- The work principle of our emulsifiers is based on the **continuous, ascendant and vertical mixing**. This means that the product, starting from the impeller (propeller), goes through the stator with a cutting effect and reduction of the granulation, afterwards it rises towards the deflection disk, that provides to convoy it towards the lateral walls of the container; without capturing any air.
- Guide column – emulsifying group support in stainless steel AISI 304; with counter balanced-retractable manually.
- **Inverter** to regulate the speed of the asynchronous three-phase motor.

Features		3-4	4-15
capacità/capacity	lt	4	15
potenza/power	Kw	0,18	0,37
velocità/speed	giri/min	2800	2800

Dimensions Width 500x425xh1600 mm
