

# SYSTEM P.B.L. 370

SYSTEM WASHING AND STERILIZATION  
MILK TANK

TECNOLOGIE  
**COMINOX**

In the last years Tecnologie Cominox is building machines for the food industry, in specific way washing machines for milk-cheese industry. The objective of the company is always been the production of equipment of high quality and the assistance the for every kind of problem to the costumer; for example the design of system for every requirement. Tecnologie Cominox built its machine on the bases of the latest discoveries of the technology to guarantee big advantages, in particular the significantly saving of water consumption.

Our most important system is **SYSTEM type P.B.L. 370**: an automatic installation for washing and sterilization of milk tank.

*System characteristic:*

- Supporting structure in stainless steel AISI 304 with guides of sliding in non-toxic material suitable at the contact with food (law F.D.A.);
- Line with **pallet** movement, flexible, safe and ergonomic. It uses the modulate system of chain transport.
- Washing box of internal and external part of the tank.
- Sterilization box only internal part of the tank with low pressure steam.
- Protection handrail in stainless steel in the long of the two run's way.

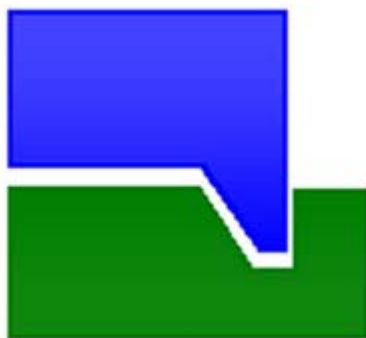

*Technical data:*

- Productivity sec.35 x No. 1 tank
- Water consumption lt. 22÷25 x No. 1 tank at 10 bar

For complete there is the **SYSTEM type P.C.L 270**: an automatic installation for washing and sterilization of covers of milk tank.

*Technical data:*

- Productivity No./h 240 about
- Water consumption lt. 9,3 x No. 1 covers
